

# Discussion workshop

**Goal:** Identify **3 concrete actions** based on a specific issue to minimize the impact of residual materials on the environment.

## Workshop process

- ❖ 1 minute: Individually
- ❖ 3 minutes: Discuss with your neighbor to reach a consensus over 3 actions
- ❖ 8 minutes: Discuss with your table to reach a consensus over 3 actions
- ❖ Plenary : Group recap

# Context

- ❖ Context 1: Several dangerous materials can be found in the wild in your community. Name three concrete actions (in priority order) to prevent the contamination of the environment.
- ❖ Context 2: At your ecocentre, you are accumulating a lot of dangerous materials. Name three concrete actions (in priority order) that you could adopt in order to ensure a good management.
- ❖ Context 3: The landfill where your waste is sent is rapidly filling up. Name three concrete actions (in priority order) that you could adapt to maximize its lifespan.
- ❖ Context 4: You see community members disposing of dangerous materials, construction debris, etc. in their waste bin. Name three concrete actions (in priority order) that you should adopt to prevent this situation.
